## **New! LEMO Announces the 0T Series – Watertight Connector**

**Rohnert Park, California** — LEMO, a global leader in the design and manufacture of precision custom connection solutions has recently announced a new watertight connector, [the 0T Series](#).

The 0T Series Connector offers a new innovative design for the defense/security, test & measurement, medical and any other market/application that requires a watertight connection. The 0T Series Connector is a small sized watertight connector using the same original LEMO Push-Pull technology. Based on the LEMO B Series, the 0T Series Connector includes a special construction with an inner-sleeve and extra sealing to enable IP68 water protection. The 0T Series is available in 2- to 9-contact configurations. Contacts can be terminated by soldering to the wire, crimping onto the wire, or directly to a PCB. A keying system ensures correct connector alignment and the connector outershell offers full EMI shielding.

The 0T Series utilizes the proven high-performance contact system and configurations from the highly popular LEMO B Series range, providing a very wide selection of options that can be made available quickly. It is backwardly compatible with the B Series, with the same receptacle panel-hole diameter, which will be a benefit to customers wanting to upgrade their existing designs.

The connector outershell is available in black-chrome finish or plated brass, making the product ideal for defense systems such as aircraft communications, land vehicles, night-vision equipment, simulation or personal battle equipment, as well as in the test & measurement and other industries wherever the environmental conditions require ruggedized equipment. The 0T Series catalog can be found at: [http://intra.lemo.ch/catalog/ROW/UK\\_English/T\\_series\\_en.pdf](http://intra.lemo.ch/catalog/ROW/UK_English/T_series_en.pdf). Please note that additional T Series sizes will be available soon.

LEMO also provides wire, cable assemblies, prototypes and custom designs with the same uncompromising commitment to quality.

LEMO's representatives and distributors can be found globally to conveniently serve customers and their needs. For more information about LEMO Connectors, please call 1-800-444-5366 or visit our website at [www.lemo.com](http://www.lemo.com).
